Richmond beats the normal price on 17 of the 26 routes we track

255 graded fares out of RIC · August 17 – October 19, 2026

255	64	$52	23
FARES GRADED	DAYS TRACKED	CHEAPEST FARE	TOP-GRADE FARES

Average Richmond fare against what each route normally costs

Orange routes came in **below** the normal price for that route. Navy routes came in **above** it. Several routes travelers might expect to be easy bargains aren't — JFK, LaGuardia, Chicago and Miami all averaged above normal, with JFK the weakest value in the set.

Charleston at $98, four separate times

A fare that recurs is a different kind of fact from a one-off — it means a traveler who waits will very likely get another chance.

Sep 8	Sep 15	Sep 25	Oct 9
$98	$98	$98	$98

Method. Every fare is graded against what that specific route normally costs, not a flat dollar threshold — $575 to Rome and $98 to Charleston aren't comparable numbers, but they are comparable relative to their own routes. Percentages above are averages across all fares observed on each route.

Caveats. These are fares observed over 64 days, not every fare that existed. Prices are accurate as of the date found, not today. 64 days is a real sample but not a seasonal one.
